Use cases

Intruder Detection

Drones for home security or monitoring commercial properties, can relay live-video footage, remove blind spots both during day and night, track and follow trespassers and intruders reducing the possibility of theft and damage.

Perimeter Guarding

Residential or private properties can pre-define boundaries, monitor a target area from a safe distance with live updates of potential threats entering the perimeter. Drones can aid security cameras 24×7 through integration of IR sensors for both day & night surveillance.

Border Patrol

Monitor high-risk operations and unsafe zones with drones, allowing police or security forces to get situational awareness & make tactical decisions from afar. Also, control a fleet of hybrid drones, make route changes, adjust gimbals for multi-angle information.
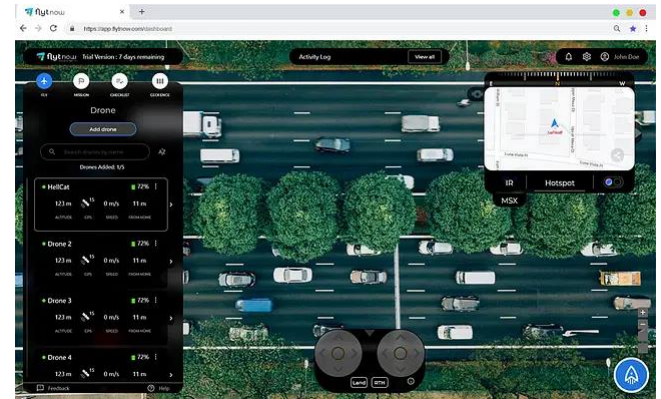

Everything you need in one place

All of the products, services and resources available to you in one place

RAWview

Fully customised & scalable drone systems

RAWview

As drone system integrators, RAWview specialise in managing the deployment of companies' own drone operations.

RAWview supplies you with the :

- necessary Drone hardware
- FlytNow software licences
- full system setup throughout (including pilot training)

How RAWview helps you?

⚖️ Feasibility & Outputs

Why choose RAWview?

Experts

Experts in commercial drone equipment & software. In-depth knowledge of drones in your industry

Simplified

Dedicated to simplifying the process of drone implementation

Trust

Trusted by some of the biggest organisations in the UK and Europe

Innovative

Access to the most innovative vendors across the drone industry

Customised Drone Training

Providing the best possible learning experience for your team

RAWview provides courses on a company-by-company basis. They are delivered via a combination of instructor-led "virtual classroom" sessions and on-site instructor visits to your premises.

- **CAA-approved commercial drone pilot training (PfCO)**

- **PfCO Operations Manual consultancy**

- **PfCO flight skills training**
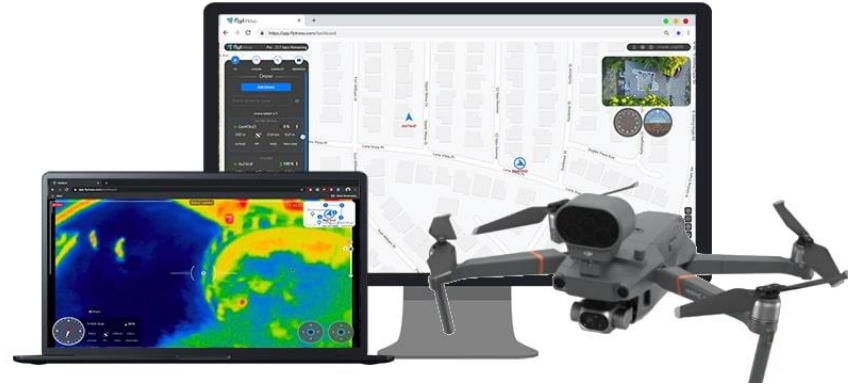

- **Photogrammetry training**

Customised Solutions

Get2Work Surveillance Pro

Everything you need to start using drones for aerial site patrols at day and night.

- [DJI Mavic 2 Enterprise Dual aircraft](#) + Smart Controller + Fly More accessory kit
- 12-month subscription to FlytNow Business Edition live streaming software for 1 drone
- Setup and integration of FlytNow software with your own private cloud storage service
- End user training
- [Customised PfCO training course](#)

From £6650 + VAT

Powered by flytnow

Get2Work Surveillance Elite

An advanced solution for aerial site patrols at day and night, with higher spec drone and thermal camera included.

- [DJI Matrice 200 V2](#) + CrystalSky 7.85" Ultra Brightness Monitor
- [DJI Zenmuse XT2](#) radiometric thermal camera
- 4x Additional TB55 Intelligent Flight Batteries
- 12-month subscription to FlytNow Business Edition live streaming software for 1 drone
- Setup and integration of FlytNow software with your own private cloud storage service
- End user training
- [Customised PfCO training course](#)

From £17,250 + VAT

Automated Drone Security & Surveillance
Software Solution

What is FlytNow?

FlytNow is a Cloud-based Drone Video Streaming & Fleet Management Solution.

Deploy automated drones for surveillance, security patrols, perimeter guarding and aerial monitoring; schedule automated patrols and control them remotely with ease on the cloud.

FlytNow enables live remote HD video streaming from drones, real-time drone & payload control, over 4G/5G at ultra low latency.

Powered by flytnow

Fleet Management & Remote Control

RAWview

- Add multiple drones

- Conduct unlimited flights

- Plan & create waypoint missions

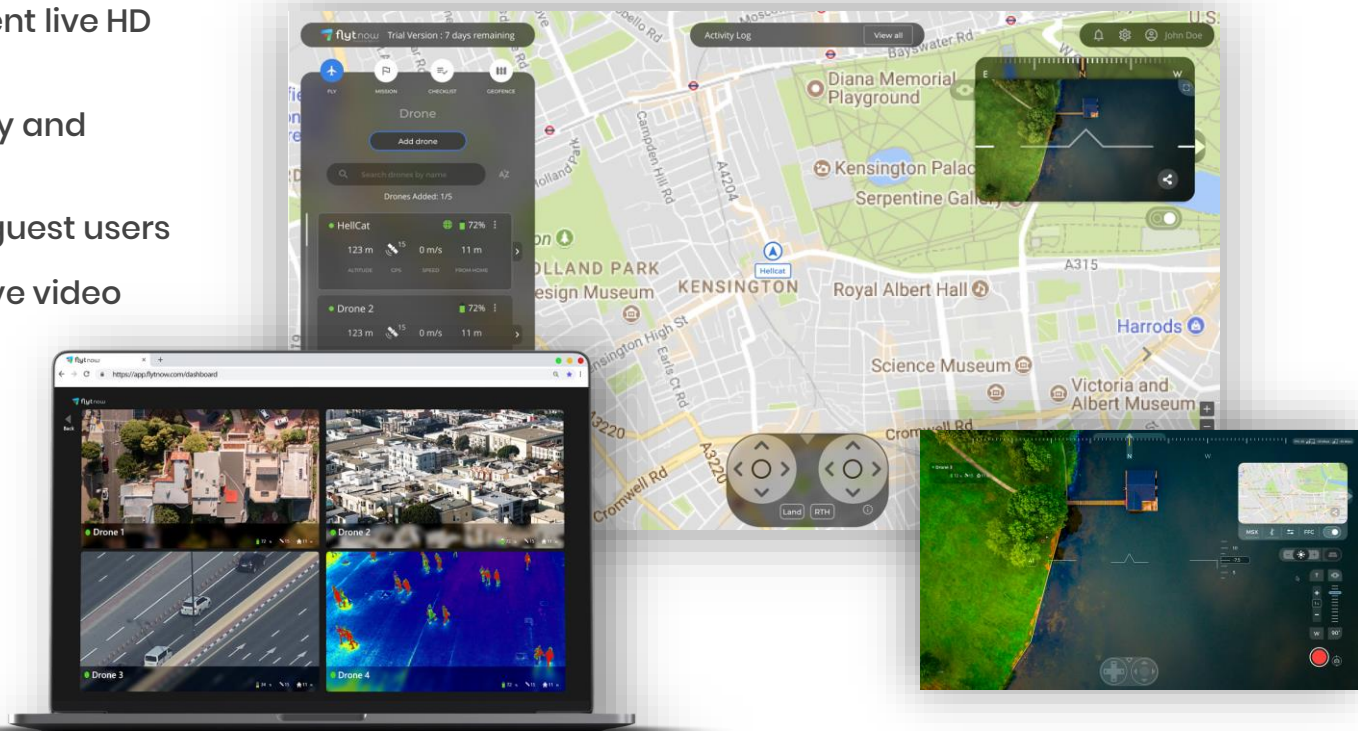

- Control drone movement and gimbal

- Control the camera zoom

- Create preflight checklists

Powered by flytnow

Live Telemetry & HD Video Feed

RAWview

- View ultra low latent live HD video feed

- View live telemetry and location on map

- Share video with guest users

- Record and archive video streams
